

WHY SPILL TACKLE?

SUSTAINABLE SOURCING AND MANUFACTURING

- Spill Tackle is proudly sourced 100% from around the US
- Manufactured 100% in Long Beach, Mississippi

EFFECTIVENESS, USAGE, AND STORAGE

- 6x more absorbent than kitty litter— One 20lb bag of Spill Tackle absorbs as much as 120 lbs (3-4 bags) of “kitty litter”
- Spill Tackle is lightweight and decreases downtime for spill cleanup
- 1 pallet of Spill Tackle (1400lbs) is roughly equivalent to 4-5 pallets or 9000lbs of “kitty litter”, for easier storage, less purchasing, transportation, and disposal costs

DISPOSAL

- Spill Tackle passes the “paint filter test ” and is leachate tested/approved
- Up to 75% less waste disposed of with Spill Tackle vs “kitty litter”
- Decreased transportation costs in transporting used drums of Spill Tackle

FACILITY SAFETY

- Spill Tackle contains no hazardous crystalline silica “dust”, a known carcinogen, found in “kitty litter” absorbents
- OSHA recommends phasing out crystalline silica in products wherever possible. So what can employers do?
 - + Replace crystalline silica materials with safer substitutes, whenever possible
 - + Wear only a N95 NIOSH certified respirator, if respirator protection is required
